

RememberQuran Mobile App

QA Testing Checklist & Step-by-Step User Manual (Pre-Release)

This document provides an exhaustive, step-by-step manual testing guide and sign-off checklist for Quality Assurance engineers validating the **RememberQuran Mobile App** on iOS and Android.

1. Pre-Testing Setup & Prerequisites

- **Account A (Existing Memoriser):** User with saved progress (Al-Fatihah, Al-Ikhlās, Al-Falaq, An-Nas).
- **Account B (Fresh Account):** Newly registered user with 0 memorised ayahs and empty queue.
- **Guest State:** Logged-out mode to verify guest prompts and login redirects.
- **Target Form Factors:** Compact Phone (iPhone SE / 360dp width), Dynamic Island/Notch (iPhone 15/16 Pro), Tablet (iPad).

2. QA Test Matrix Overview

ID	Feature / Module	Testing Scope	Priority
TC-01	Audio Sleep Timer	Options (15m-60m/End of Surah), live countdown, pause on expiry, background Doze	P0 (Critical)
TC-02	Audio Interruptions	Incoming calls, Siri/Assistant, headphone unplugging (becomingNoisy pause)	P0 (Critical)
TC-03	Juz & Hizb Navigator	30 Ajza' and 60 Ahzab tabs, surah ranges, accurate jump to starting ayah	P1 (High)
TC-04	Mushaf 15-Line Mode	Continuous RTL text, medallions, font clamp (20-34px), audio-sync page turns	P1 (High)
TC-05	Hifz Spaced Repetition	Due review banner, prompt audio, reveal, SM-2 grading, single-card loop, PopScope	P0 (Critical)
TC-06	Bulk Memorisation	Hifz mode range selector, batch Firestore write, progress persistence	P1 (High)
TC-07	Guest Mode & Auth	Safe prompts, AuthMiddleware login redirect with original destination retention	P1 (High)
TC-08	Offline Fallbacks	Airplane mode radio fallback to downloaded surahs, no infinite spinner	P1 (High)
TC-09	UI / Responsive Polish	SafeArea bottom sheets, 360dp width wrapping, native haptic feedback	P2 (Medium)

3. Step-by-Step Testing Procedures

TC-01: Audio Sleep Timer (P0)

1. Start playing any chapter from Reader or Radio. Verify MiniPlayer displays the Moon icon.
2. Tap Moon icon: verify options (Off, 15m, 30m, 45m, 60m, End of Surah).
3. Select **15 minutes**: Verify haptic feedback, active countdown chip ('14:59 remaining'), and gold Moon icon on MiniPlayer & Fullscreen Player.
4. Select **End of Surah**: Verify recitation automatically pauses at the final ayah of the current chapter.
5. **Background test**: Set 15m timer, send app to background for 3 minutes, reopen: confirm timer did not freeze.

TC-02: Audio Interruptions & Headsets (P0)

1. Connect Bluetooth earbuds or wired headphones and start audio playback.
2. **Headphone Disconnect**: Turn off Bluetooth or unplug headphones during active playback. **Expected**: Playback pauses immediately with zero audio leaking to phone speaker.
3. **Incoming Call**: Trigger a call. Verify recitation pauses on the first ring and cleans up highlight state.

TC-03: Juz & Hizb Navigation Drawer (P1)

1. In Reader, tap the **Book icon** in the top AppBar to open the Navigator.
2. **30 Ajza'**: Select Juz 2 (Al-Baqarah 142 – 252). Tap Juz 2: sheet closes and reader anchors directly at Ayah 142.
3. **60 Ahzab**: Switch segmented button to [60 Ahzab]. Tap Hizb 3: verify it jumps directly to Al-Baqarah 142.

TC-04: Mushaf 15-Line Page View (P1)

1. Open Settings Sheet > Display Mode > select **Mushaf**.
2. Verify authentic page frame, right-to-left continuous flow, and circular verse end markers.
3. **Font Clamping**: Increase reader font size to maximum (48px). Return to Mushaf: verify text size is safely clamped (20-34px) and does not overflow boundaries.
4. **Audio Sync**: Play recitation across page boundary: verify page turns automatically.

TC-05: Hifz Spaced Repetition (SRS) Flashcards (P0)

1. In Account > Hifz, locate the 'Spaced Repetition Review' banner showing due ayahs.
2. Tap **Review** to enter fullscreen session. Verify Arabic text is initially hidden.
3. Tap the speaker icon: verify it recites the verse as an audio prompt.
4. Tap **Reveal Verse**: verify haptic click, verse unmask, and 4 grading buttons appear (Again, Hard, Good, Easy).
5. **Single-Card Loop (Edge Case)**: When only 1 card is due, tap 'Again (1d)': verify the same card resets and prompts again without crashing.
6. Complete queue: verify Session Complete screen appears. Tap 'Back': verify dashboard due count updates immediately via PopScope.

TC-06 & TC-07: Bulk Memorisation & Auth Safeguards (P1)

1. In Reader, turn on **Hifz Mode**. Select Ayah 1 to Ayah 4 of Surah Al-Ikhlâs.
2. Tap **Mark Ayat 1–4 as memorised**: verify batch update and check 100% completion in Hifz dashboard.
3. **Guest Auth**: Log out. Tap Hifz in Account tab: verify clean redirect to Login. After logging in, verify user is sent directly back to Hifz, not Home.

4. Release Sign-Off Sheet

Verification Item	Status	Notes / QA Initials
TC-01: Sleep timer stops playback & persists in background	☐ PASS ☐ FAIL	
TC-02: Headphone unplug immediately pauses audio	☐ PASS ☐ FAIL	
TC-03: Juz & Hizb navigation scrolls to exact Ayah	☐ PASS ☐ FAIL	
TC-04: Mushaf mode renders continuous 15-line RTL with clamped font	☐ PASS ☐ FAIL	
TC-05: SRS flashcard reveal, SM-2 grading, and 1-card loop pass	☐ PASS ☐ FAIL	
TC-06: Bulk memorisation saves in Firestore batch	☐ PASS ☐ FAIL	
TC-07: Guest login redirect returns to requested destination	☐ PASS ☐ FAIL	
TC-08: Offline airplane mode fails gracefully to downloads	☐ PASS ☐ FAIL	
TC-09: Responsive layout on 360dp width and haptic feedback	☐ PASS ☐ FAIL	
TC-10: Automated suite ('flutter test') passes with 0 failures	☐ PASS ☐ FAIL
